

PROGRAMME OVERVIEW

The course is taught by dedicated tutors and introduces the formal elements of art and design theory and practice, which are: line, tone, colour, texture, shape, pattern, composition, form, perspective and markmaking.

As part of studio practice and workshops, students will begin to use the formal elements creatively through skills developed in:

- Drawing and Painting
- Printmaking
- Fundamental 2D and 3D Design
- Photomedia
- Fashion Textiles

Cultural Visits

- Professional artist and designer visitors
- Museums
- Art Galleries

Study Skills

Structured support and personalised English language tuition is given throughout the course to bring students to the point where they could succeed at A level and develop a strong art and design vocabulary.

Subject to confirmation students may be able to obtain a Cambridge iGCSE in Art and Design.

April 2020 Intake

Tuition: **£9,820** Boarding: **£3,998**

Dates: **14 April - 19 June 2020**

STUDY ABROAD

Study Abroad @ ISCA offers students the perfect opportunity to experience the benefits of an excellent UK art and design education first hand. A key element of Study Abroad is to encourage young people to engage in the creative process and foster critical thinking skills to realise their ideas.

Art and design teaching at ISCA focuses on developing practical skills through the development of ideas. English language tuition is an integral part of the course. Alongside studio-based lessons, students can enjoy all that creative London has to offer through organised research trips to museums and galleries.

Study Abroad @ ISCA is a unique way to develop your creativity, across a broad range of art, design and fashion subjects in a supportive educational environment.

It is also designed to prepare students for either A levels or the Portfolio Programme. It is specifically for students who may not have previously studied art to a sufficient level or may need to improve their language ability. It can be seen as the first step to an extended course at ISCA.
