## SCHOLARSHIP PRIZES 2020

At the end of the academic year, ISCA awards generous scholarships to deserving first year students who have excelled in their work. The scholarships take the form of a significant reduction in tuition fees and are decided after careful consideration by all the tutors.

In previous years, students have won for showing exceptional creativity and experimentation, as well as studio-based practice and their contribution to the ISCA community. After winning the Ambassador prize last year, Mely Itzae Montemayor Ayala said, 'I'm very grateful to have obtained a scholarship. I worked hard in all my subjects and to make my community better, and being recognised with this award is a boost of motivation and confidence.'

ISCA will be announcing this year's recipients later in the term and there will be a special prize-giving occasion at the start of the year.
