

TASKED WITH A MASK

The Big Fun Creative Mask Challenge kick started the extracurricular activity programme which is running throughout the summer term. Following a presentation, students had just one hour to design and produce a mask inspired by the theme of Escape using everyday materials.

The results were varied and highly original, with students creatively 'escaping' to a multitude of places including outer space, alternative cultures and the countryside. It was great fun to engage in an idea outside of timetabled lessons and all students demonstrated typical ISCA spirit by taking on this challenging task with such enthusiasm. Tutors now have the difficult job of selecting the winning masks!

Further events will be announced shortly and include origami, embroidery and food-themed challenges.
