

ISCA @ WORK AND PLAY

We are delighted to have resumed face-to-face teaching for those on campus and the work coming out of the studios shows real visual thinking and experimentation. Many parents and invited guests were able to join us for the live mid-term critique, which was an opportunity to find out more about the creative process and importance of critical exchange.

Year 2 students have started to receive university offers and are preparing carefully for their interviews with the support of tutors. Out of the studios, students are making real use of the campus tennis courts and many took part in a recent rounders match with staff.

There has been a trip to Black Park, a vast area of woodland close to the school, which has been used as a film location in blockbusters including Harry Potter and Batman. The students enjoyed exploring the park, capturing on camera the majestic trees and beautiful lake.

Closer to home, the cooking club themed around sharing international dishes continues to be very popular, and most recently French Toast Hong Kong Style was a tasty hit with the students!
