

ISCA AUTUMN EVENTS

On a recent visit to the Royal Air Force Museum students explored the stories of the people, equipment and innovations that have kept the RAF at the leading edge of air and space power. Students were fascinated by the incredible displays ranging from the origins of flight to real life modern fighter jets. They were able to gather valuable research through photography and observational drawings all of which inspire and generate ideas for project work.

The focus for Year 2 students has centred on finding out about university options in order to make those all-important course choices. To facilitate this process, we were delighted to welcome two leading higher education institutions to the ISCA campus - Goldsmiths University and Kingston University. During both presentations, students were able to ask questions about university life and how to make a strong application.

October ended with students celebrating Hallowe'en at a special party. They carved pumpkins, donned fancy dress and transformed the Common Room into a magical Halloween space. All in all a spooky and fun evening!
