

NEW YEAR, NEW AMBITIONS

We would like to wish all ISCA students, their families and the wider school community a very happy and healthy 2023. There has certainly been a busy and productive start to the new term. Year 2 students are working hard on their portfolios ahead of the approaching deadlines for university submission. They are being supported through this intensive period by their personal progression tutor and subject tutors.

Year 1 and Level 2 students have embarked on their new project themes. In order to gather a wealth of primary research there have been school trips to some of London's most prestigious museums including the Design Museum, which features exhibits related to product, graphic, fashion and architectural design. There were also visits to exhibitions at the V&A and the Science Museum to help inspire ideas and creative thinking.

There are a few places still remaining for the ISCA Summer Programmes in 2023 - please do get in touch if you are interested in finding out more about this popular course of creative arts study.
