

Workshop Focus

A new initiative at ISCA is yielding exciting and thought-provoking work from Year 1 students. Weekly workshops, based around the theme Creativity Matters, challenge students to produce work to fulfil a given brief. Each week a different subject specialism is explored through experimentation, skills development and collaborative thinking. The group presentation and critique at the end of each workshop encourages all involved to reflect fully on their achievements.

ISCA Exhibition in Bangkok

We are delighted to announce that ISCA is planning a special exhibition at the Bangkok Art and Culture Centre. The exhibition will showcase the work of ISCA students and staff and include specialist workshops delivered by Executive Director Colin Kerrigan and Lead Fashion Tutor Silja Manninen. All creative subjects and process work will be represented. The Exhibition opens in March 2024 and further details will be made available in the coming months.

In High Spirits

This year's Hallowe'en party was a great success with students using their artistic talents to create dramatic costumes and magical decorations. A spooky and fun evening was had by all!

Garden Project

Level 2 students have been invited to transform a local community garden into an enjoyable and eco-friendly space for everyone to enjoy. Students will work as a team to create a design for St Andrew's Eco Garden and we look forward to seeing how their ideas are brought to life.
